Project Name	Free Standing Hammock Shack
Project Type	Gadget/Shelter
Equipment Needed	6 larger staves and 6 medium staves per hammock, rope, pegs and mallet
Directions	Create two tripods with the large poles and add base support using the short poles. Position both tripods so that a horizontal bar faces the vertice of the other tripod. Tie the hammock from said points. You may need to add extra support to the tripods by tying vents along each side. Optionally, you can hang a tarp or mosquito net along the tips of the tripods.
Photo	
Other Notes	You can create a shape (ie. Hexagon) to increase the number of hammocks you can hang. (See above) Make sure that the lashings are very tight if you are going to sleep on it or make use of the structure. Test it out beforehand.
